

FAST MUR

disinfecting-protecting concentrate

APPLICATION **FAST MUR** is a reliable preparation for removing all kinds of excrescences, mould, algae, fungi and lichen from walls, façade, plaster, concrete, lime, stones without destroying their structure.

CHARACTERISTICS **FAST MUR** is a ready for use preparation ensuring a hundred percent effect in eliminating microorganisms, and after performing the preventing measures – it inhibits both migration and formation of excrescences. Durability of the protection depends on the intensity the environment has on the structures subject to disinfection. **FAST MUR** is odour-less and transparent.

PREPARATION OF Before applying **FAST MUR**, the surface must be pressure sprayed with water. In case of large greenish forms, they should be removed mechanically.

PREPARATION AND Apply carefully **FAST MUR** in affluence onto the previously prepared, as indicated above, structure using a garden sprayer or brush. Leave for about 6 to 12 hours. Then, remove the remains of the microorganisms after disinfection with water under pressure. In order to strengthen the effect of disinfection, reapply the preparation. If there are small greenish forms it is allowable to dilute the preparation with water at the ratio of 1:1 which will automatically increase the area of application. Inside building, before applying **FAST MUR**, do not spray surfaces with water, however clean them carefully mechanically with a stiff-hair brush.

EFFICIENCY The use of the emulsion depends greatly on the degree lichen occupy the area and is approximately 0,05 – 0,20 l/m².

STORAGE Store in tightly closed packages at the temperature of from +5°C up to +25°C. Suitability for use: 12 months.

TECHNICAL SPECIFICATIONS Temperature of the base: **from + 5°C to + 25° C**
Use of the base: **after 12 hours**
Density: **approximately 1,00 kg/ dm³**

PACKAGES Containers 5l
Pallets: 540 kg in 5 l containers (108 items)

FAST MUR disinfecting-protecting concentrate

STANDARDS / NORMS

Manufactured according to: PN-C-81906:2003
Sanitary Certificate issued by the State Sanitary Department no HK/B/ 1725/01/2002.
